WORK HISTORY

Manager – UAB "Jungtinės Maitinimo Pajėgos", Vilnius, Lithuania Jun 2022 – Feb 2025

- Increased operational visibility by 25% by implementing an inventory control system with accurate stock tracking and Excel-based data analysis.
- Cut inventory carrying costs by 10% by shifting to just-in-time ordering driven by demand-pattern analysis.
- Resolved customer inquiries within a 24-hour SLA by using Excel to analyze customer data and pinpoint issues quickly, which kept client relationships strong.
- Streamlined supply chain processes by working with cross-functional teams and turning operational data into actionable insights.
- Kept the operation compliant with health, safety and quality standards by maintaining systematic documentation and running regular process audits.

EDUCATION

Vilnius Gediminas Technical University, Vilnius, Lithuania
Bachelor's In Mechanical Engineering | 2018-2022

Mykolas Romeris University, Vilnius, Lithuania
Master of Business Management in Logistic management | *2024 – 2025*

PROJECTS

Inventory Discrepancy Management System *January 2025*

- Analyzed real-world case of inventory discrepancy management in logistics operations, documenting challenges and solutions in warehouse management systems
- Developed comprehensive case study methodology incorporating document analysis, stakeholder interviews, and system documentation review
- Identified root causes of inventory inaccuracies including manual data entry errors, system integration gaps, and lack of real-time visibility
- Recommended implementation of automated reconciliation processes and predictive quality management systems
